

Grill Safety Tips

When you have or use a grill, you should:

- Always keep the grill **clean**.
- Check to see that the **hose** from your gas tank to your grill is **not leaking gas** anywhere.
- Never use **flammable** or **combustible** liquid (liquid that can catch fire, like lighter fluid) with a gas grill.
- Keep the grill away from things that might catch fire.
- Don't let kids come within **3 feet**, or **1 meter**, of the grill while it's hot.
- Never store **propane cylinders** in buildings or garages.
