CHAPTER 84 — Reading from Text Files

Chapter Topics:

- Reader
- FileReader and BufferedReader
- readLine()
- Text file copy program
- C-style input loop

An input stream can be connected to a text file. With character-oriented input streams, characters are automatically translated from the external (disk file) format to the internal (Java `char`) format.

QUESTION 1:

What is the ancestor class of all character-oriented input streams?
